

ENAMEL 9

Sunday October 30th - Thursday 3rd November 2016

The ninth Enamel Symposium (“Enamel 9”) will be hosted in the UK, in the lovely Yorkshire countryside, close to the spa town of Harrogate at the beautiful Rudding Park venue (see: <http://www.ruddingpark.co.uk/home.aspx>).

Over the past 50 years, the Enamel conferences shine out as beacons of scientific excellence, lively debate and collegiality of spirit. The ninth international symposium, Enamel 9, will follow this tradition, highlighting unsolved questions and challenging previous beliefs as well as providing new insights in to all aspects of enamel biology and chemistry via our international community of researchers.

- Open access peer-reviewed publication in “Frontiers of Physiology”
- Travel awards for early career researchers
- Keynote speakers
- CPD accreditation
- Unrivalled conference venue
- Easily accessible for international travel
- International Scientific Committee

Co-Chairs: Jennifer Kirkham (Leeds, UK) and Ariane Berdal (Paris, France)
